

FOODSERVICE

GRAB-AND-GO AND TAKE-OUT ARE MORE IMPORTANT NOW THAN EVER.

You know it. Your customers are asking for it.

Consumers are rating “Clean and Sanitary” as a top consideration for choosing a restaurant or dining facility in the current environment, according to a recent 2020 Datassential poll. Grab-and-go and contactless take-out menu options are the best way to serve food in the most sanitary way possible.

Sandwiches are the perfect option for contactless, grab-and-go concepts and LSR. According to the 2019 Technomic Top 500 Report, sandwich-focused concepts have more units than any other LSR menu focus in the industry.

According to SmartBlogs, 50% of consumers say that even as social distancing guidelines are eased, they will continue to order take-out instead of dining in to minimize contact.¹
